

Employees

We lead by example and by agreement. We promote a performance-oriented corporate culture in mutual respect. We treat each other in a cooperative, uncomplicated and constructive manner.

The environment should be designed in such a way that employees become co-entrepreneurs. We want to achieve excellence through training and innovation at all levels.

Economic efficiency

We develop an appropriate return on investment in which our shareholders, employees and the company can participate.

Our investments are geared towards long-term prosperity and securing competitive jobs.

Legal and regulatory obligations

Our company and its employees comply with the laws and regulations applicable to our business activities. To ensure this, we make the necessary information available.

Quality management system

We comply with the requirements of EN 9100:2018, ISO 9001:2015 and ISO 13485:2016 and maintain the effectiveness of the quality system.

We are committed to continuously improving our products, processes and quality management system.

Customers and markets

We want to be an innovative, quality-conscious and open partner for our customers. We focus our activities entirely on our customers and their needs and see the establishment of a relationship of trust as the foundation.

Engagement

We are oriented towards the demands and ideas of our customers and potential customers. All our activities are aimed at creating added value for our customers.

Due to our geographical location, we aim to produce products with a large added value.

Product quality

The fulfilment of the required quality is existential.

The corresponding and recognisable legal and regulatory requirements are observed.

Suppliers

We look for our suppliers throughout Europe and strive for long-term cooperation with the aim of jointly securing and expanding market shares.

Environmental protection

We work sustainably and environmentally consciously in all processes of our company. We use raw materials and energy sparingly and promote recycling in a targeted manner.

Occupational safety

We want to reduce accidents and occupational illnesses through preventive protective measures, instructions and information for our employees.

Investment in the future

We train apprentices in various areas of our operations and encourage their further education.
